

Janusz Skotarczak

Python / Full Stack Developer

Bydgoszcz, Poland | +48 695 539 923
skotarczak.janusz@gmail.com | januszskotarczak.pl
github.com/Snakeoi | linkedin.com/in/skotarczakjanusz

Skills

Backend

Python, Flask, REST API
SQLAlchemy, Marshmallow
Jinja2, Pandas, ETL

Frontend

JavaScript, Vue 3
Options API
Composition API
Pinia, HTML, CSS / SCSS
Chart.js, Axios

Databases

PostgreSQL, MariaDB
Microsoft SQL Server
SQLite, Redis
Alembic, SQL migrations
Database design and views

Testing

pytest, fixtures, mocks
API and database testing
Selenium - basics
Manual UI testing

Development environment

Linux / Red Hat, Bash
Apache, Git, Bitbucket
Docker - local development environments

Basic knowledge

Django, FastAPI

Languages

Polish - native
English - B2/C1
Regular professional communication in English

Professional profile

Python developer with professional experience since 2019. I build web applications with Flask and Vue 3, REST API integrations and business process automation tools. I design databases, write tests and automate deployments. My experience includes independently developing and maintaining products, as well as leading a four-person IT and marketing team.

Professional experience

Nordea

Developer / Senior IT Infrastructure Specialist
02.2024 - present

- Develop backend applications and REST APIs with Python/Flask, and single-page applications with Vue.js.
- Take responsibility for maintaining a third-party application and contribute to decisions on the development of internal applications.
- Write automated API and database tests in pytest using fixtures and mocks; perform UI testing, including with Selenium.
- Work with MariaDB, PostgreSQL and Microsoft SQL Server; design databases, manage Alembic/SQL migrations, and implement data processing and ETL.
- Work with Red Hat servers and Apache. Automate deployments with Bash: database backups, pulling code from Git, database migrations and frontend updates.
- Review code, integrate changes and maintain technical documentation. Automate Jira and Bitbucket workflows using the Atlassian API.

Automatykon Sp. z o.o.

Full Stack Developer / freelance
04.2023 - 02.2024

- Independently developed a Flask and Vue application for a poultry farm controller, with a touchscreen interface, Chart.js visualisations and multilingual support.
- Integrated services using SQLite and Redis; designed the database, managed migrations and wrote automated backend tests in pytest.

Janusz Skotarczak

Tools and practices

Tools

PyCharm, DataGrip
GitHub, Postman
Jira, Confluence

AI-assisted development

GitHub Copilot, Codex
Specification-driven development (SDD)

Working practices

Code review and documentation
Collaboration with users
Independent ownership of application development
Knowledge sharing and teamwork

Education

Nicolaus Copernicus University in Toruń
Art Education
Bachelor's degree, 2011 - 2014

Earlier experience

08.2015 - 12.2019
Worked as a graphic designer and ammonia refrigeration plant operator.

Otinus sp. z o.o.

Developer / IT Department Manager
12.2019 - 11.2023

- Developed business applications using Python/Flask, PHP and JavaScript, and REST API integrations with sales platforms.
- Designed databases and migrations; improved data access by reducing unnecessary reads and using SQL views instead of complex ORM queries. Wrote automated backend tests in pytest.
- Led a four-person IT and marketing team. Onboarded the developer taking over the applications and transferred technical knowledge.

Selected solutions

Sellos - independently designed, built and deployed a PHP application for preparing sales quotations, based on management requirements and user feedback. Developed and maintained the application, including its machinery catalogue, pricing and technical specifications.

Over 13,000 quotations prepared between 02.2021 and 11.2023; generation of a **30-page quotation PDF in approximately 2 minutes.** Support for multiple currencies, user permissions, product configurations and NIP24 integration.

Otinus Contract Generator - a Vue application for generating contracts. Reduced contract preparation time by half.

Otinus Job Tools - a Flask application supporting e-commerce: product description generation with Jinja2, data synchronisation through the WooCommerce, OLX and Machineseeker APIs, web scraping with BeautifulSoup, and data analysis with Pandas.

I consent to the processing of my personal data for recruitment purposes under Article 6(1)(a) of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
